

TeamMate®

Audit Management System

Technology is the key enabler to every audit team. TeamMate supports your valuable team with effective ways to communicate and collaborate. Upgrading to Release 10 will help your team make the most of technology.

Upgrading from TeamMate R9 to R10

Improvements with Release 10 over R9 include:

- Structure improvements with Audit Plan and Suite Wide Organizational Hierarchy
- Multiple Recommendations for issues
- Dashboard views in EWP and TeamCentral
- Surveys to gather valuable information
- Checklist perspectives for checklist-style audits
- New standard EWP Reports
- Integration with Active Directory
- Enhancements to All Modules Including Ribbons
- Expanded TeamRisk functionality and flexibility

Upgrading from TeamMate R8 to R10

If you're moving from R8 to Release 10, you'll see the improvements listed above, plus:

- Suite integration including EWP database platform centralization
- Expanded EWP replication models
- TeamCentral reporting improvements
- Risk and Control focused methodology options
- Centralized administration management through TeamAdmin
